

Database Creation Guide

Nutrition Assistant - Database Connection

1. Install packages:

`npm install mongoose dotenv`

2. Create .env

`PORT=5000`

`MONGO_URI=mongodb://127.0.0.1:27017/nutrition_assistant`

3. Create `server/config/db.js` and add MongoDB connection using mongoose.

4. Import `connectDB()` into `server.js` and call it before `app.listen()`.

5. Run:

`node server.js` or `npx nodemon server.js`
