

ROLES AND RESPONSIBILITIES

The Nutrition Assistant System consists of three major roles: Client, User, and Admin. Each role has specific responsibilities that ensure the smooth functioning of the application and provide a secure, personalized nutrition experience.

4. ROLES AND RESPONSIBILITIES

The Nutrition Assistant System consists of three major roles: Client, User, and Admin. Each role has specific responsibilities that ensure the smooth functioning of the application and provide a secure, personalized nutrition experience.

1. Client

The Client is any visitor who accesses the Nutrition Assistant website without logging in. Clients can explore the application and decide whether to register for personalized nutrition services.

Responsibilities of Client

- Access the landing page.
- View information about the Nutrition Assistant application.
- Explore the features and benefits of the system.
- Navigate through public pages.
- Register a new account.
- Login using registered credentials.
- Contact support or view help information.

2. User

The User is a registered person who can access personalized nutrition services after successful login.

- Responsibilities of User
- Register and login securely.
- Update personal profile information.
- Enter age, height, weight, gender, and activity level.
- Generate personalized nutrition plans.
- Calculate BMI automatically.
- View calorie, protein, and carbohydrate requirements.
- Receive personalized meal recommendations.
- View walking and fitness recommendations.
- Access previous nutrition history.
- Manage account information.
- Logout securely.

3. Admin

The Admin manages the entire Nutrition Assistant system and monitors users, nutrition plans, and database records.

- Responsibilities of Admin
- Secure administrator login.
- View all registered users.
- Manage user accounts.

- View all nutrition suggestions.
- Delete unwanted or outdated suggestions.
- Monitor application activities.
- Maintain MongoDB database records.
- Ensure application security.
- Manage system performance.
- Logout securely.
